Electronic Clipping

Produced by FLC Plásticos, a well-established brand in the flexible PVC laminate market, synonymous with quality and high technology, the Adhesive Vinyl is suitable for use in visual communication, where it can be used for decoration, signage of rooms or vehicles.

The product consists of a self-adhesive film made up of a calendered PVC film, water-based adhesive and paper liner.

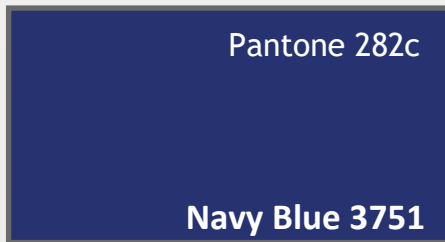

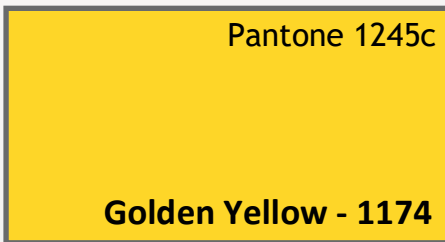

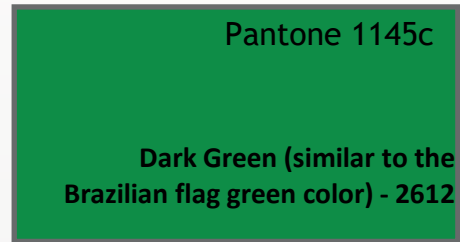

Features

- Product to be processed in electronic clipping, for indoor and outdoor display (flat surfaces and simple curves);
 - Technologies:
 - Electronic clipping.
 - Expectation: durability of 8 years, vertical (indoor/outdoor). For horizontal applications, the expected durability can be reduced by around 20%.
- * The expected durability refers to the adhesive vinyl.

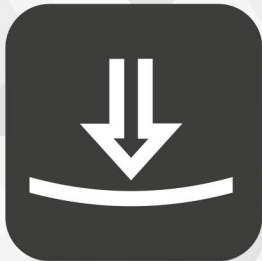

Technical Features

Film	Calendered polymeric PVC
